The date on which the response, the petition, and the fee have been filed is the date of the response and also the date for the purposes of determining the period of extension and the corresponding amount of the fee. Any extension fee pursuant to 37 CFR 1.17 will be calculated from the date of the originally set shortened statutory period for response or as set forth in b) above.

Art Unit: 1644

The proposed amendment would raise issues of new matter. Dependent claims 3 and 30 would only require that at least one, not all, of the Ag binding regions comprise an sFv. The examiner reads the original disclosure as only describing the case in which all such regions are sFv.

The arguments regarding the linkers are unconvincing. The disclosure has given no hint that selection of appropriate markers is unpredictable as to which will be operative, and applicant has presented no claim limited to any preferred, exemplified linker. Applicant's claims are not commensurate in scope with the arguments.

The request for reconsideration of 1/5/00 refers to literature not of record and not supplied. In any case discussion of these is tantamount to the introduction of new exhibits which applicant could have earlier presented. Further, consideration of these would require more than a cursory review, which is all that is required after final.
